Kexuan Huang (黄克轩)

15800962172 Huang.KX@sjtu.edu.cn Shanghai
Senior Student

SUMMARY

- I had several experiences of internship and project. As a fast learner and team player, I can always get things done reliably.
- I'm familiar with Python, C, C++, Matlab, Verilog, JS. I have experiences of Web scraping, data analysis, embedded programming, APP and Web development. Furthermore, I'm familiar with Latex, Markdown, Microsoft Office and XMind.

EDUCATION

Shanghai Jiaotong University - UM-SJTU Joint Institute 2018.08 - 2022.07
B.S.E in Electrical and Computer Engineering (Major GPA: 3.6 / 4.0) Shanghai

Shanghai Jiaotong University - School of Innovation and Entrepreneurship 2020.01 - 2022.07
Minor in Entrepreneurship (GPA: 3.85 / 4.0) Shanghai

PROFESSIONAL EXPERIENCE

Shanghai Jiaotong University, UM-SJTU Joint Institute 2021.05 - Present
Teaching Assistant, Undergraduate Education Office Shanghai

- I graded assignments, hold workshops and Q&A sessions to help students learn better in courses VE300 & VE496.

Advanced Micro Devices, Inc. (AMD) 2020.12 - 2021.05
Design Verification intern, dGPU SOC, Shanghai R&D Center Shanghai

- I worked on HDL code and check waveform to do troubleshooting.
- I used Python, together with other scripting languages, to code automation scripts and maintain regression flow for more efficient debugging. Moreover, I used Python for web scraping, data analysis and webpage setup.

Segway-Ninebot, Inc. 2020.01 - 2020.03
Embedded Software Intern, IoT R&D Department. Shanghai

- I worked on development of autonomous delivery robot, specifically in communication & decision-making strategy optimization.
- I used C to do embedded programming on the STM32 chip, as well as PCB testing and feedback reporting.

PROJECT EXPERIENCE

"Latency-Robust Control of High-Speed Signal-Free Intersections" Research Group, Research Intern. 2021.05 - 2021.08
2021 Research Intern Program, UM-SJTU Joint Institute.

- I joined research team of Prof. Jin and participated in group meeting, paper reading & model simulating in SUMO with Python.

Digital Innovation of the Fever Thermometer, Team Leader 2020.09 - 2021.03
Participate in Research Program (A-level Project: 3/26), Antai College of Economics & Management

- I developed a WeChat mini-program, along with the hardware circuit and PCB, enabling users to connect the thermometer with a phone with greater efficiency in a broader using scenario. We conducted market analysis in hospitals, communities & schools.

Intelligent firefighting system based on Internet-of-Things technology, Team Member 2021.08 - 2021.12
Capstone Project

- Cooperating with Shanghai and Shandong Fire Brigade. We developed an integrated firefighting system based on IoT to perform fire risk management with greater accuracy, better efficiency and lower cost.
- Implement backend server with Python & FastAPI, and web & app frontend with React. We use MongoDB as database.

HONORS & AWARDS

2020-2021 Merit Undergraduate Scholarship, SJTU 2021.11
2019-2020 Most Improved Scholarship, SJTU 2020.10
Advanced Teaching Assistant, UM-SJTU Joint Institute 2021.08

Language and other

- **Languages:** English (IELTS 7.5 / CET-6)
- **Hobby:** badminton (former professional athlete, former SJTU badminton team member), anime piano
